

SC 45TW

Scanjet tank cleaning equipment

KEY FEATURES

SC 45TW

- Optimised cleaning effect
- Easy handling
- Safe operation
- Designed for long lifetime
- Media lubricated

Scanjet Model SC 45TW can be used for fixed installation on down pipe or for portable cleaning on a flexible hose.

SC 45TW is available in bronze or stainless steel versions and is therefore suitable for any type of tank cleaning operation. Our range of accessories, such as hoses, hose saddles, hose connectors or adapters, y-pieces and valves also covers any type of operation.

Typical applications for SC 45TW:

- Crude oil carriers
- Product carriers
- Offshore
- Bulk carriers
- OBO carriers
- FPSO & FSU

Accessories:

Connections

To suit any type of connection, various types of adapters and connectors are available in suitable materials for the marine environment.

Hoses

The standard hose comes with two stainless steel bonded wires for electrostatic protection.
